

To defeat ALL Windows 10 Pro Updates:

1. Run "gpedit.msc".
2. Under "Computer Configuration," select "Administrative Templates."
3. Under "Setting," select "Windows Components."
4. Under "Setting," select "Windows Update."
5. Under "Setting," select "Configure Automatic Updates."
6. Select "Enabled," Yes, ENABLED (instead of "Not Configured").
7. Select "Notify for download and notify for install."
8. Select "OK."
9. Close.
